About Me

Product Designer focused on creating intuitive digital products that balance user needs with business goals, with a strong interest in SaaS, Fintech,and AI-powered products.

Experience

Web Designer (Internship) — Oct 2026 - Present

Syntecxhub

- Designed a B2B fintech landing page for PayLink, focusing on brand consistency, clear messaging, and simplifying payments for service-based businesses.
- Designed Faye, an editorial-style personal portfolio website, exploring advanced typography, art direction, and interactive web presentation.
- Applied user-centered design principles to deliver cohesive digital experiences across both web projects.

UI UX Designer (Internship) — May & June 2026

PetroCortex

- Designed high-fidelity screens, user flows, and interactive prototypes for the Omnilor platform to validate user journeys.
- Built and maintained a scalable design system utilizing reusable components and design variables to streamline handoff.

UI UX Projects — Feb 2026- Apr 2026

- Orbit (Trading Dashboard): Designed a high-contrast financial trading dashboard tailored for complex market monitoring and data visualization.
- KYC Onboarding: Developed a multi-step identity verification user flow minimizing friction and drop-off rates.
- Garlic Digital Solution: Built a structured design system and developer handoff documentation for a small business web solution.
- Contextual Spending Insights: Designed user-centric data visualization modules for financial tracking and behavioral insights.
